

Market Release Note

MRN-NXX-8-WZ-AU-35

Product number:	NXX-8-WZ-AU
Hills Product Number:	S110618
Product description:	Hills Reliance XR Pro panel
Product version:	A59P000009-35
Affected parts:	Hills Reliance XR Pro Panel
Release date:	19, October 2020

New features added in this release

- 4G Router module AP (Access Point) mode support – Cameras and WIFI Touchscreen can be connected directly onto the 4G router module
- Added "Antenna Tamper" in system options to enable/disable antenna tamper detection from the panel box tamper
- Panel monitoring and alarm reporting via 4G is disabled when panel is not provisioned in the web portal.

Numerous stability improvements and bug fixes have been made. These include:

- Fixed an issue where UltraSync cameras do not scan in properly when 4G router module is used.
- Fixed an issue where upgrading firmware from DLX900 shows errors when it has been upgraded successfully.

Known issues

- Motion detection push notifications
- DLX900 will be unable to program or backup AP (Access Point) mode settings.
- When upgrading existing panel configured in DLX900 to this firmware, DLX900 will ask to change panel type. Click on "Yes". This is required for this release of firmware.
